

KABUKI INU

WHITE PAPER

KARUKI NINJA

We want to become the go-to platform when it comes to marketing crypto tokens in the BSC. Our objective is to build a set of apps that allow any project developer to provide its holders with the needed tools to promote their coins while earning cryptocurrencies in return.

Anyone will be able to earn money by using referral links that allow others to purchase cryptocurrencies in our platform.

We want to become the DexTools of Marketing.

HOW DO PEOPLE BENEFIT?

As an individual, everyone will be able to come to our platform and see projects that are looking for influencers. There, users will be able to select which project or projects they want to promote and they will be granted referral links. People will be able to share those referral links in their social networks and people buying through these links in our platform will be automatically given crypto rewards.

People will no longer have to go through Telegram groups looking for the admins to spam their services. Our platform will be self-service in the sense that you don't need to interact with anyone in order to earn rewards for promoting coins. Some examples:

1. Have a huge Telegram channel? Great, you just post your referral in the channel and you earn money.
2. Have a ton of followers in Twitter? Simply post a nice tweet and let the cash come in.
3. Are you a normal person that likes to talk crypto with friends? That's OK as well, simply share the link with them and you will still get some money, beers are on you!

HOW DO HOLDERS BENEFIT?

For every purchase done using our referral links, a small fee will be taken and distributed across all kabuki inu holders.

Think of this like major credit card companies or Point of Sale device providers:

they earn a very small fee on every transaction, but due to the high volume of transactions companies like VISA or MasterCard are some of the biggest companies in the world.

Additionally, shillers and project developers will be asked to hold a certain amount of kabuki inu to be able to use the platform.

Given that fees are also obtained on every kabuki inu purchase, holders will passively earn income at a faster ratio.

HOW DO TOKEN DEVS BENEFIT?

Right now, as a starting project developer, there's only a limited amount of things you can do to market your product. You can only post some tweets and reddit posts and hope for the best.

If you want to go beyond that, the amount of money needed to get your coin promoted is prohibitive for starting developers, and the worst thing is that you don't get guaranteed results, as you may pay a Youtuber for shilling your project and have no one buy your coin anyway.

We are here to put an end to that, you will only pay for what you achieve. In our platform you will be able to set bounty rewards for the returns you expect from your marketing campaigns. A few examples:

- You create a campaign to get more Telegram followers: In this case you will only pay for every new Telegram user that joins your group using a referral link.
- You want to increase the amount of holders of your token: you will be able to set a bounty that rewards people for every purchase done using their referral link.

Just post your project in our platform and people will come and promote it without you having to do anything, this is putting marketing in autopilot!

HOW INFLUENCERS BENEFIT?

Big influencers will benefit from the platform the same way normal people do but in a huge scale. In this case, due to the amount of followers big influencers have they are expected to have a lot of people buying with their referral link, and hence a lot of rewards.

TOKENOMICS

10% Buy Tax

BUY 10% Marketing & Buybacks

For bringing more and more people to know our good boy and this legendary art, not really known on eastern cultures.

15% Sell Tax

Marketing & Buybacks

SELL 3% Liquidity

BUY 2% Liquidity

To provision the masuseki with latest doma and bringing the best food so the spectators can have the best time on the show.

ROADMAP - MILESTONES

1

Genin

50k MC (UNLOCKED)

unlocked Lot&s of small call channels !

unlocked Caesar call !

unlocked Web release !

2

Chunin

100k MC (UNLOCKED)

unlocked Poocoin Adds applied !

unlocked 30 minutes 1% buy event !

3

Jounin

Unlocking at 500k MC
